How Procurement Functions Can Leverage Outsourcing

Connect with Gartner

Thomas Pocock

Senior Director, Procurement Advisory

Tom Pocock is a Senior Director Procurement Advisory in the Supply Chain Operations team. Mr Pocock brings over 15 years of experience in research and advisory roles to support Procurement leaders in elevating the role of procurement within the enterprise. As an expert in procurement strategy, organizational design, talent management, influence and process improvement, Tom takes a pragmatic approach in helping CPOs and their teams achieve success in their transformation journeys.

View of BPO Value

Potential Advantages of Outsourcing

- Easy to expand / contract staffing levels as required, based on demand
- Improved productivity and efficiency through economies of scale
- Improved access to skills and expertise (including, but not limited to, market intelligence and category expertise)
- Operating cost reduction
- Ability to redeploy retained staff on projects of strategic importance
- Access to emerging and advanced technology without significant additional outlay
- Improved process performance and reporting transparency
- Faster implementation of best practices

Potential Disadvantages of Outsourcing

- Lower flexibility to adapt to internal customer requirements
- Lack of process knowledge – can be challenging to bring services back in-house due to skill atrophy
- Lack of (your) business expertise.
- Minimum-term contracts, meaning medium- to long-term commitment to the BPO.
- Internal staff and competencies required to manage and support outsourced provider.
- May overemphasize commercial levers.
- Without incentivization for process improvement, the BPO provider will focus on running the process as it's designed, as efficiently as possible — not on making improvements to the process.
- Risk of stalling process maturity improvement if the contract lacks contractual productivity gains.
- Loss of control over things such as supplier relationships in outsourced categories.
- Potential for cultural differences and challenges with the BPO provider.
- Intellectual property and data security concerns.
- Potential for conflict of interest if BPO provider is also a technology provider with access to details of competitors' bids.
- Need to manage reduction / redeployment of internal staff

The Future of Cloud in 2027: From Technology to Business Innovation

As cloud computing evolves from technology enabler to business disruptor, IT leaders must ensure they understand their organization's business strategy. Only then can they seek opportunities to leverage new and emerging cloud capabilities to accelerate that strategy. This free webinar reveals Gartner's top predictions for where cloud computing will be by 2027, and explores how these predictions will shape your cloud value proposition.

- Explore what cloud computing will look like in 2027
- Discover how multi-cloud and cloud native can affect organizations' cloud efforts
- Ensure a successful cloud journey for your organization
