

How can VCs ace intro calls with founders using AI?

(In 6 steps)

By Guillermo Flor
Venture Capital Investor

*Imagine stepping into an intro call already armed with **everything** you need to know about the company.*

Their history, products, market position—even the challenges they're tackling right now.

*A well-prepared investor **stands out**, showing genuine interest and asking the right questions from the start.*

Being prepared isn't optional anymore.

It's a must.

But preparing takes time and it's not possible to do it for every single meeting.

*The good news is with AI, you can walk into every call **fully prepared in a fraction of the time.***

Here's how it works...

Step 1:

Search for a company's profile on eilla.ai (link in post).

The screenshot displays the EILLA platform interface. On the left, there is a sidebar with various workflow options like 'Competitor Analysis', 'Deep dive on a company', and 'Recent Workflows'. The main area shows a detailed company profile for 'Payhawk'.

Payhawk Profile Details:

- General:** Headquarter Location: London, United Kingdom; # of Employees: 339; Year Founded: 2018; Company Status: Private; Total Raised: £239.1M; Last Transaction: Series B - \$115M; Acquired by: Entity Name.
- Company Description:** Payhawk is a comprehensive platform that integrates business credit and debit cards, payments, expenses, and cash management into one seamless experience. It provides advanced spend controls, automated expense management, and real-time visibility for businesses of all sizes. Payhawk aims to simplify financial operations and enhance budget control for organizations globally.
- Industry:** Business spend management.
- USP:** Integrated platform for global spend management.
- Problem Solved:** Inefficient management of corporate spending and expenses.

Summary

Background and experience:
The executive team at Payhawk brings a diverse range of expertise in product management, software development, finance, legal, and marketing. Hristo Borisov's extensive experience in enterprise software and product management positions him well to lead the company. Boyko Karadzhov's technical background ensures strong product development capabilities. Konstantin Dzhengozov's financial expertise is crucial for managing the company's financial health. Andrey Bankovski and Ivan Linev add valuable business and legal insights, respectively, while Jack H Cummings strengthens the marketing function. (3)

Composition:
The executive team is well-rounded with key roles in technology, finance, legal, and marketing. Recent hires, including a Chief Risk Officer and Legal Director, further strengthen the team. However, the team could benefit from additional expertise in operations to support scaling efforts. (3)

Organizational structure:
The company has a balanced distribution of employees across various departments, with a strong focus on technical roles (53 employees) and sales (51 employees). However, the marketing department, with only 12 employees, may need to expand to support the company's growth and market presence. (3)

Employee satisfaction and trust in the business:
The company has a strong overall employee satisfaction score of 4.1, with significant quarterly improvement (+0.8). High scores in compensation (4.4) and career opportunities (4.2) indicate a positive work environment. However, work-life balance (3.8) and diversity and inclusion (3.9) show room for improvement. The CEO enjoys high approval (83%), and 81% of employees are optimistic about the company's outlook, though the 77% recommendation rate suggests some lingering concerns. (3)

Step 3:

You can enrich your analysis by **uploading pitch decks or notes** on the selected company.

The screenshot shows the EILLA platform interface. On the left, a company profile for "Payhawk" is displayed. A blue dashed line connects the "Add internal data" button to a modal window on the right. The modal contains a message about generating unique insights from internal data, a file upload section with a checked PDF file, and a notes editor. Another blue dashed line connects the notes editor to a "Proprietary Data" section at the bottom left, which lists various data sources like crunchbase, LinkedIn, S&P Global, and RocketReach. A third blue dashed line connects the notes editor to a summary section at the bottom right, which includes a logo and text about Payhawk's unique selling points (USPs). The overall theme is data enrichment and analysis.

Step 4:

Generate **key questions** for the intro call based on all the collected company information.

P Payhawk | Key Questions

Category	Questions
Product and Services	How do Payhawk's integrations with ERP and accounting systems streamline financial workflows?
	What are the specific functionalities of Payhawk's multi-entity management feature?
	How does Payhawk's partnership with Wise Platform enhance its global payment capabilities?
Team	What measures are in place to attract and retain top talent, especially in the competitive fintech industry?
	How do you handle the challenges of rapid headcount growth while ensuring that new hires align with your company values and goals?
Client & Business model	How do you plan to handle the diverse regulatory environments across the 32 countries you operate in?
	What strategies are you implementing to attract and retain enterprise clients, considering your current focus on multinational companies?
Vision	What are the key milestones you aim to achieve in the next 3-5 years to align with your vision for Payhawk?

Source: LinkedIn, Crunchbase, Financial Times

Step 5:

Discover **investment highlights** across team, product, market, client and business model, funding and other company aspects.

P Payhawk | Investment Highlight

Category	Highlights
Product and Services	Payhawk integrates with 38+ platforms, including Oracle NetSuite and SAP. It offers global bank accounts, payment capabilities in 30+ countries, fraud prevention, real-time visibility, and multi-entity management.
Team	Boyko Karadzhov brings strong development skills, while CEO Hristo Borisov is an award-winning expert in product management. Both have solid educational and industry experience.
Market	Spend Management market is expected to grow at 11.8% CAGR, driven by cloud solutions, AI, ML, and demand for real-time spend analysis and cost-cutting.
Client and business model	Payhawk serves top clients like Luxair, Babbel, and Vinted across 32 countries. Its strong ERP integration and comprehensive solutions make it versatile and widely adopted.
Funding	Payhawk has raised \$239.1M, including \$100M in Series B, backed by Lightspeed Venture Partners and Earlybird Venture Capital, reflecting strong financial health and growth potential.

Source: LinkedIn, Crunchbase, Financial Times

Step 6:

Uncover **risks** and examine potential **mitigants** to discuss in the intro call.

P Payhawk | Risk and Mitigants

Category	Risks	Mitigants
Product & Services	Managing direct reimbursements in over 100 countries poses regulatory and delay risks, while reliance on AI for accounting rules may lead to errors. Enterprise integrations with ERP systems increase failure rates, and processing multi-currency bank accounts exposes the company to compliance issues. High user mobility could lead to data privacy concerns.	Mitigant: Partnership with Wise and a multi-currency wallet system streamline international transactions. Regular AI retraining and HITL validation improve accuracy, automated integration testing and redundant synchronization ensure reliability, centralized compliance management and third-party audits mitigate regulatory risks, and end-to-end encryption with RBAC and MFA protect data privacy.
Team	Segment headcount growth since September 2020 and no founders with a successful exit or prior collaborative experience pose scaling and decision-making risks.	Targeted recruitment and an employee referral program attract talent, experienced advisors guide exits, and team-building workshops with a formal decision-making framework improve collaboration.
Funding	A busy cap table with 10 investors complicates decision-making. High concentration of funding from top-tier investors may lead to significant influence, and rapid headcount growth strains resources.	A voting trust agreement and shareholder agreement simplify decision-making, diversifying the investor base and an independent advisory board reduce undue influence, and a phased hiring plan with performance-based milestones manage growth.
Market	Accessing data across multiple systems, securing budget for vendor management software, and managing risk and compliance are significant challenges.	Robust integration capabilities and AI-powered data harmonization tools streamline data access, high ROI demonstrations and flexible pricing models justify investment, and integration with security tools and real-time compliance checks enhance risk management.

Source: LinkedIn, Crunchbase, Financial Times

Step 7:

Finally, **export** the company insights as a **one-pager** ahead of your meeting.

The screenshot shows the EILLA platform interface. At the top, there are tabs for 'Rovco' and 'Compar'. Below the tabs, the breadcrumb navigation shows 'Company Search > Enriched Company Profile'. The main content area is titled 'Payhawk | One-Pager'. On the left, there's a sidebar with icons for Home, Company, People, and Help. The main content includes a company logo, a summary section with founders' profiles, a USP section, a team section with a Glassdoor review, a product & services section with a detailed offering, a technical specifications section, a market section, and a key clients section. The interface has a dark theme with blue and white text.
