

VISA

# HOW IS VISA BRINGING ACCOUNT-TO-ACCOUNT PAYMENTS INTO THE 21ST CENTURY?

With Visa A2A, Visa is bringing its decades of experience and investment in payment innovations to give consumers more choice, control and protection on how they pay via bank transfers.

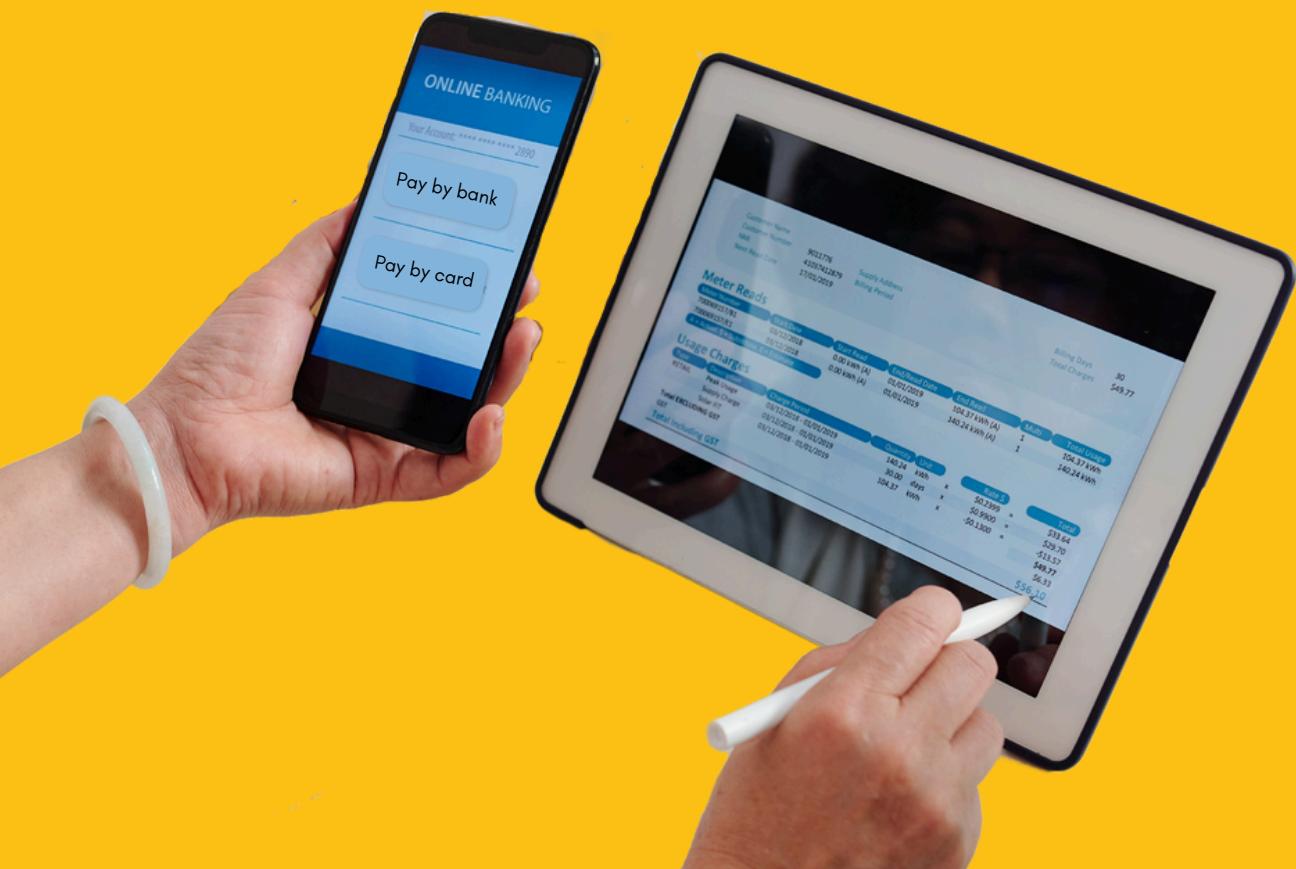

# Visa A2A

Live in the UK in 2025,  
Visa A2A will launch with  
bill payments such as  
utilities, rent and childcare  
fees, and in the future  
will follow with  
subscriptions of both  
products and services.

# More Choice

More choice for consumers to pay for products and services directly from their bank account, with the click of a button.

# Stronger Protection

A dispute resolution process will provide consumers with a reliable way to check transactions, whilst innovations such as biometrics will add a new level of security.

# Smart Control

Easy to set up and manage payment permissions so consumers are in control over when payments are made and can set limit amounts, providing them more choice, control and protection over their finances.
