TLDR Your rundown on fintech in Q2'24

19%

Increase in funding, buoyed by two blockbuster deals.

Global fintech funding rose in Q2'24 to \$8.9B, up 19% quarter-over-quarter (QoQ). Yet, absent 2 late-stage deals for Stripe (\$694M) and AlphaSense (\$650M), funding would have remained flat.

A 16% decline in deal volume also indicates fintech investors remain cautious.

[See the data →](#)

\$12.8M

Average deal size in 2024 so far, down 4% from 2023.

The slight decline in average deal size YTD highlights broad stagnation in fintech deal sizes.

However, a 29% increase in the median deal size this year, to \$4M, could signal strength in the long tail of smaller fintech deals.

[See the data →](#)

20%

Mid- and late-stage deal share YTD, up from 18% in 2023.

In a more favorable operating environment, investors are showing greater confidence in later-stage companies than they did in the last 2 years. This is especially true in areas like payments and lending, where mid- and late-stage rounds make up 27% and 35%, respectively, of deals YTD.

[See the data →](#)

30%

Of top early-stage deals go to digital asset companies.

Fintechs focused on cryptocurrency and blockchain are receiving renewed focus, as the crypto winter thaws. Across the top seed/angel and Series A deals in Q2'24, nearly one-third went to digital asset companies.

The largest of these were for TradeDog and Biton, both digital asset infrastructure platforms.

[See the data →](#)

45%

Growth in funding in the US, to \$4.8B.

In addition to the quarterly funding increase, the US led the world across a few metrics in Q2'24, including share of equity deals (40%) and exits (36%). Mega-rounds led the way: 9 of the 10 biggest deals in the US were worth \$100M+, the most since Q2'22.

LatAm was the only other major global region with a funding increase, up by 22% QoQ to \$4.2B.

If you have questions about the definitions or methodological principles used, or if you feel that your firm has been underrepresented, please reach out to info@cbinsights.com.

What is included:

Equity financings into private companies only. Funding rounds raised by public companies of any kind on any exchange (including Pink Sheets) are excluded from our numbers, even if they received investment from a venture firm.

Only includes the investment made in the quarter for tranches investments. If a company does a second closing of its Series B round for \$5M and previously had closed \$2M in a prior quarter, only the \$5M is reflected.

Round numbers reflect what has closed, not what is intended. If a company indicates the closing of \$5M out of a desired raise of \$15M, our numbers reflect only the amount which has closed.

Only verifiable fundings are included. Fundings are verified via (1) various federal and state regulatory filings; (2) direct confirmation with firm or investor; (3) press release; or (4) credible media sources.

Equity fundings to joint ventures and spinoffs/spinouts are included.

Unicorn data includes private companies valued at \$1B or more in the private markets globally, per the same 4 sources listed above and relied on for funding events, which include valuations disclosed in credible media sources. The list is maintained publicly and updated in real time at <https://www.cbinsights.com/research-unicorn-companies>.

Geography notes: Israel funding figures are classified in Europe; funding to Oceania is included in global figures but not spotlighted in this report.

Rounds to private companies that may be majority- or minority-owned subsidiaries of other private companies.

Valuation data includes estimates to calibrate median and average valuations based on current and previous quarter disclosed valuations gathered from the aforementioned four sources. The estimating method will control for the oversampling of large rounds that are reported quickly versus a comparative lag in valuations obtained from other sources. Valuation data reflects post-money valuations.

Exits include IPOs, SPACs, publicly announced M&A deals, and other liquidity events; only first exits are counted.

Headquarters are determined by publicly available sources including company-owned websites and profiles, legal filings, and press releases.

All figures in the report are in USD.

US financing trends follow the combined statistical area (CSA) methodology. Silicon Valley refers to the San Jose-San Francisco-Oakland CSA.

What is excluded:

No contingent funding. If a company receives a commitment for \$20M subject to hitting certain milestones but first gets \$8M, only the \$8M is included in our data.

No business development/R&D arrangements, whether transferable into equity now, later, or never. If a company signs a \$300M R&D partnership with a larger corporation, this is not equity financing nor is it from venture capital firms. As a result, it is not included.

No buyouts, consolidations, or recapitalizations. All three of these transaction types are commonly employed by private

equity firms and are tracked by CB Insights. However, they are excluded for the purposes of this report.

No private placements. These investments, also known as PIPEs (Private Investment in Public Equities), are not included even if made by a venture capital firm.

No debt/loans of any kind (except convertible notes). Venture debt or any kind of debt/loan issued to emerging, startup companies, even if included as an additional part of an equity financing, is not included. If a company receives \$3M with \$2M from venture investors and \$1M in debt, only the \$2M is included in these statistics.

No non-equity government funding. Grants or loans by the federal government, state agencies, or public-private partnerships to emerging, startup companies are not included.

No fundings to subsidiaries of a larger parent corporation unless that subsidiary is a private entity and meets other criteria for inclusion.

Accelerators, incubators, business-plan competitions, economic-development entities are excluded from rankings of most active investors, even if making equity financings.

Rankings for top investors are calculated according to "company count," or the number of unique companies an investor funds in a quarter, and so excludes follow-on deals.
